## Men from Mars and Women from Venus?

Different planets? Physically, yes. Psychologically, no.
On physical characteristics, like strength, men and women fall into distinct groups with very little overlap. But for most psychological attributes, including masculine attitudes, variability within each sex and overlap between the sexes is extensive.

The physical strength graph shows statistical analysis of the scores for the National Collegiate Athletic Association's long jump, high jump, and javelin throw competitions. The masculinity-assertiveness graph is based on self-reported measures of competitiveness, decisiveness, sense of superiority, persistence, confidence, and the ability to stand up under pressure.

## Hiring and Promotion Are Crucial

The Relationship Between Finalist Pools and Actual Hiring Decisions
According to one study of 598 finalists
for university teaching positions.

## Reduce Bias in Hiring

- Create objective standards
- Rewrite your job descriptions
- Widen your recruitment pool
- Standardize interviews
- Test your applicants
- Hire by committee
